

## Your Complication Cost Protection Plan

You've taken a lot of time and careful consideration to choose your surgeon – and so have we!

BLIS is an exclusive program offered only to select surgeons who qualify based on strict standards. BLIS isn't health insurance, but rather a specialty insurance that provides financial protection for you against costs that may arise from specific complications.

### What does **BLIS Protection** do for you?

- BLIS pays for all of your medical bills related to a covered complication including any facility fees, surgeon fees, professional charges, rehabilitation, and any other ancillary costs as directed and approved by your BLIS surgeon.
- Any concerns regarding covered complications be immediately addressed between you and your BLIS surgeon enabling the continuation of care, including diagnosis and treatment.
- Alleviates concern by planning ahead for unexpected medical bills that may exceed the cost of your surgery.

### Important steps to be **BLIS Protected**:

1

#### **CONTACT BLIS PRIOR TO YOUR SURGERY**

Call: 877-280-2547 (BLIS)  
or Email: Patients@BLISCompany.com

Your dedicated BLIS representative will help you to understand the complication protection advantage, and review the specific options your BLIS surgeon has prearranged for you.

2

#### **PROMPTLY REPORT**

Any complications or concerns you may be experiencing after surgery to your BLIS surgeon or the surgeon's staff. If you do not consult with your BLIS surgeon prior to seeking medical care, your BLIS protection may not apply.\*

**We look forward to serving you.**

\*Restrictions and limitations apply, including but not limited to the requirement that the patient (consumer) return to the operating surgeon if practicable. BLIS reserves the right to change terms and conditions without notice. Coverage allows the surgeon to authorize and provide medically necessary healthcare for covered complications at no additional cost to the patient. BLIS is not an insurance company. BLIS is authorized as a managing general underwriter for insurance carriers that are highly rated by insurance ratings agencies. The insured under the policy is the surgeon and the risks covered are designated post surgical complications occurring within designated time limits.
